

## **Postdoctoral Research Scholar Position in Biogeochemical Processes in Subsurface Reservoirs at the University of Illinois at Urbana-Champaign**

The Energy Biosciences Institute, in cooperation with the Department of Geology and the Department of Civil and Environmental Engineering at the University of Illinois at Urbana-Champaign, is seeking an outstanding candidate for a full-time Postdoctoral Research Associate position. The Postdoctoral Research Associate will participate in a cross-disciplinary project being directed by Drs. Bruce Fouke and Charles Werth, and will lead laboratory research related to pore-scale transport and biogeochemical processes in deep subsurface reservoirs using microfluidic-based methods. A PhD in geology, environmental engineering, chemical engineering, geomicrobiology, or related field is required by the time of joining. Excellent oral and written communication skills are also required. This is a one-year appointment with the possibility of an extension after a progress review. Salary will be commensurate with qualifications and experience. This is a benefits-eligible position.

To apply, send a single pdf file by May 15, 2014 with your CV, the names of three professional references, and a cover letter (describing how your background and qualifications relate to the position) to Joan Christian via email at [jchristn@illinois.edu](mailto:jchristn@illinois.edu). The position is available immediately.

The University of Illinois at Urbana-Champaign is an equal opportunity/affirmative action employer. All qualified applicants are encouraged to apply and will receive consideration for employment free from discrimination on the basis of race, creed, color, national origin, age, sex, pregnancy, sexual orientation, gender identity, genetic information, religion, associational preference, status as a qualified individual with a disability, or status as a protected veteran.
