

## PromegaExpress™ Automatic Program

### How to purchase products from a PExAuto unit

#### It's easy and convenient!

All PExAuto units know your default billing address, shipping address, and payment method – it pulls this information directly from what you entered in your online registration at [www.promega.com](http://www.promega.com).

#### You do not need to place the order online!

Simply go to the freezer, open the door with your pass and remove the product you need.

#### Instructions

1. Present your PromegaPass to the front Promega logo located on the front outside of the unit. The Promega logo will illuminate and the door lock will release. (If you have any problems, please contact the Promega Customer Service Department.)
2. Once the logo illuminates, you can open the door and purchase product.
3. There will be a product map posted on the PExAuto freezers to help you locate desired products quickly.
4. Once you've located the product you want, simply remove that product from the freezer and close the door. Please verify that the door locks when closed.
5. An order will automatically be generated based on the defaults you set when registering. You will receive a confirmation e-mail confirming your purchase.

#### Notes

- Order History: You can view your orders when you log into your online account at [www.promega.com](http://www.promega.com) under My Accounts>Order History.
- If you have any questions, please contact Promega's Customer Service Department at 800.356.9526.
