Core Facilities at the IGB is your resource for Light Microscopy, Image Analysis, and Analytical Instrumentation. Our facility provides both step-by-step instruction and in-depth training, allowing researchers to acquire new techniques quickly. With 24/7 access for both IGB researchers and the campus community, IGB Core Facilities can be viewed as an extension of your lab. Our facility is meant to encourage innovation—try new techniques and approaches to achieve your research goals without a significant investment in instrumentation or time. The Core Facilities is a ZEISS Labs@location partner, enabling us to provide both beta instrumentation and advance training to the campus.
